Executive Coordinator

It's hard to believe that I have been here for a month. As a former nurse and teacher, it has been my privilege to get to know the members of our board and many of our volunteers who have such varied backgrounds and experiences. I look forward to developing new relationships with all of our people here and extending our relationship with others in our community. The door to the office is always open for questions, concerns, encouragement, ideas or just to chat.

Research has shown that people who volunteer often live longer.
